

Encl. #8.1
Dec. 18, 2014

The following items were donated to the Intermediate School and the Middle School from the Wings of Eagles Discovery Center:

To the Intermediate School (Stephanie Lewis*):

35mm camera with case
Still camera from a bomber plane
Video camera from a bomber plane
Beta video camera
Military plane headset and microphone

To the Middle School (Brian Steele):

Air Force / US Army Sextant Type A10-A
Compensating Sight model K-13

*These items are antiquated; museum pieces from the Wings of Eagles. Intermediate School Teacher Stephanie Lewis is attempting to build a technology museum in the school that shows the progression of technologies that students would not be familiar with, and that they may take for granted since their cell phones can do many tasks, such as voice communication, still photography, as well as audio and video recordings.
