RE: Corning Partners in Community Program

Dear Terrie Hunter,

We are pleased to inform you that Horseheads High School was chosen to participate in the 2015 "Corning Partners in Community" Program. Corning employee Stephen Caracci submitted your school to receive a generous product award to support local academic science education.

Corning Life Sciences enjoys giving back to the communities within which our employees live and work. We would like to offer your school a donation of frequently used lab products worth approximately \$4,000.00. This award includes leading brands such as Corning, Falcon® and PYREX® and items such as pipettes, centrifuge tubes, beakers, media bottles, graduated cylinders, Erlenmeyer flasks, dishes and hotplate/stirrers.

Lab products will ship prior to the start of the 2015-2016 school year. All schools will receive a Certificate of Participation, and Corning will be submitting an article to the local newspapers.

Corning Life Sciences is dedicated to its customers and community. To accept this donation please respond to Linda Lord via email at [lordlj@corning.com](mailto:lordlj@corning.com) before May 15, 2015.

Sincerely,

Linda Lord  
Partner's Program Administrator

John Duke  
Division Vice President and program sponsor  
Business Operations-Life Sciences

*Corning Life Sciences brings new and innovative laboratory tools to researchers. Our core technical competencies include polymer science, biochemistry and molecular biology, glass melting and forming, surface modification, and characterization science. As part of Corning Incorporated, we are a world leader in specialty glass and have over 150 years of tradition in innovation.*
