

ENERGY MANAGEMENT

The Board of Education desires that efforts be made to conserve energy and natural resources while exercising sound financial management. The Superintendent ~~of Schools~~ or designee is charged with the responsibility of developing energy conservation guidelines. Once developed, it is expected that all personnel, students, and community members will assist in the implementation of these guidelines.

~~As a result of these efforts, the Board will fulfill its obligation to make the best use of the financial support received from the community.~~
